21.07.2021 | Job-Nr.: 1516

ASCO Engineering (www.asco-engineering.at) – a member of ASCO Group International (www.asco-group.at) - is a technical service provider in the field of plant construction, mechanical engineering, automotive engineering, electrical engineering and information technology. As a specialist in Human Resource Management and Quality Management, the company focuses on the implementation and support of in-house projects as well as external projects for our customers.

We are looking for a motivated System Engineer (m/f/d) for our client - a famous company in the automotive industry.

Graz-Umgebung | Hardwareentwicklung

Ihre Aufgaben...

- Technical coordination in the development phase of Li-ion batteries at system level
- Technical clarifications with the customer
- Discussion of system requirements with the customer and elaboration of system specifications
- Development of the system architecture in cooperation with other development teams
- The development takes place according to automotive processes (ASPICE and ISO 26262)

Unsere Anforderungen...

- Technical education (Bachelor, Master, PhD)
- Knowledge in the field of embedded systems development

- Understanding of the functional interrelationships existing in the overall system (electrochemistry, high-voltage components, electronics, mechanics, software)
- Independent, systematic and process-oriented approach, great initiative and sense of responsibility
- Strong team and communication skills
- Very good knowledge of English, German knowledge is an advantage

Unser Angebot...

- Options for individual and specialised education and training
- Good working atmosphere in an internationally successful company
- Flat hierarchies and short decision paths
- Flexible working hours, employee parking spaces and good public transport connections
- The opportunity to actively shape your own career

Mindestgehalt

Minimum gross salary EUR 3.500 for 38,5 hours per week. Possibility of overpayment depending on your qualification and experience!
